

SETABASE & Palmayya

Who We Are

SETABASE at a glance

SETABASE is a services company based in New Cairo, Egypt. Our ambition is simple: **to bring together in one place everything a property and the people who use it — individuals and companies alike — need.**

We support property owners, residential compounds, companies and expats with an approach that sets us apart: combining **rigorous administrative management** with **hands-on technical work in the field**, whereas most local providers cover only one of the two.

We are a young, fast-growing company organized around four complementary departments, alongside Palmayya, our real estate sales company.

Our four departments

1. Property Management

We manage rental properties on behalf of their owners, who are often investors living abroad. In practice, this covers tenant relations, rent collection, accounting and payment of charges, handling technical issues (water leaks, broken lifts...), organizing owners' meetings, and renting out or selling properties. Our offers are designed for individual owners as well as compounds and companies.

2. Facility Management

We take care of the day-to-day operational needs of buildings and companies: security, cleaning, gardening, technical maintenance, IT, waste management, minor works and more. We rely on our own field teams and a network of specialized partners, and we systematically follow up with clients after each job to check their satisfaction. Our clients range from compounds and companies to hotels, schools, malls and developers, as well as private homeowners (villas, apartments). The business is launching in New Cairo and Hurgada and will gradually expand to other cities across Egypt.

3. Relocation

We help people and companies settle in Egypt. Before the move: choosing a neighborhood that fits their lifestyle, finding a home, and finding schools for the children. During the move: organizing the shipment of their belongings. On arrival: signing the lease, opening a bank account, setting up phone, internet and utilities, and furnishing the home. We also offer orientation support (culture, healthcare, language courses) and optional services (residence paperwork, car rental, drivers...). We work both with companies bringing in foreign employees and with individuals: families, students and retirees.

4. Special Services

We offer companies subscription-based packages to improve their teams' well-being and comfort:

- **At the office:** regular deliveries (coffee, fresh fruit, healthy snacks, flowers, office supplies, hygiene products), team breakfasts, and welcome kits for new hires.
- **Well-being:** health check-ups, fitness coaching, yoga and meditation, nutritionist, mental wellness coaching, training sessions and workshops.
- **Events:** team building (felucca trip on the Nile, Egyptian cooking workshop, desert safari...), afterworks, cultural celebrations (Ramadan iftar, Eid, Christmas), company anniversaries and product launches.

Packages are flexible and adapt to the size and needs of each company.

Palmayya, our real estate sales company

Palmayya is a real estate sales company owned by SETABASE. Its sales teams support clients who want to buy property in Egypt, from the search all the way to the sale. Palmayya fits naturally into the group's ecosystem: a client who has relocated with our help might, for example, decide to buy rather than rent, then entrust us with managing and maintaining their property.

End-to-end support

The strength of SETABASE and Palmayya lies in how our activities complement each other. The same client can be supported at every step:

- **Settling** in Egypt with Relocation;
- **Buying** a property with Palmayya;
- **Having it managed** with Property Management;
- **Maintaining and securing it** with Facility Management;
- **Taking care of their teams** with Special Services.

We serve both individuals (B2C) and companies (B2B), communicating in English and Arabic.

Why join us

- **A company in the making:** you'll help set up new activities and have a direct impact on how they grow.
- **A growing team:** each department is led by a member of management, and we are hiring across several areas (operations, property management, marketing, finance and administration, IT).
- **An international environment:** clients and colleagues from diverse backgrounds, between Egypt and Europe.
- **A service- and team-driven culture:** quality work, client follow-up, team spirit and recognition of everyone's efforts.
