

# SETABASE

## Website Design Brief

New Cairo, Egypt · September 2026 · For quote & visual design

### 1. Project Overview

SETABASE is a property, facility, relocation and real estate company based in New Cairo. The site is split into three pages so that individuals and companies each see the content that's relevant to them:

- Landing page — a simple choice screen: "I'm an individual" or "I'm a company".
- Individual page — Property Management, Facility Management, Relocation and Real Estate, written for private owners, tenants, buyers and people moving to Egypt.
- Company page — Property Management, Facility Management, Corporate Relocation, Special Services and Real Estate, written for HOAs, developers and employers.

The content, structure and copy below are final and ready to use. What we need from you is a quote to turn this working draft into a polished, production-ready responsive website — see section 10 for what's still missing (photography, real logo, form backend).

### 2. Site Map

- index.html — Landing / choice screen
  - individual.html — Individual page (hero, services, contact form)
  - company.html — Company page (hero, services, contact form)

Each of the two inner pages links back to the landing page via the logo, and to each other via a small "Business? →" / "Individual? →" link in the top navigation.

### 3. Color Palette

|  | Name            | Hex     | Used for                                |
|--|-----------------|---------|-----------------------------------------|
|  | Background      | #F6F3EC | Main page background, cream             |
|  | Panel           | #ECE7DA | Hero panel base tone (light variant)    |
|  | Ink             | #1B2420 | Rarely used — legacy dark text tone     |
|  | Ink Soft / Navy | #0D1C3A | Body copy, card text, labels            |
|  | Navy Deep       | #0A1E3A | Headlines, buttons, dark panels, footer |
|  | Sand / Gold     | #B9863F | Accent — tags, hover states, links      |
|  | Line            | #D8D1BF | Hairline borders and dividers           |
|  | White           | #FFFDF9 | Card backgrounds, button text on dark   |

Swatches shown at actual hex values.

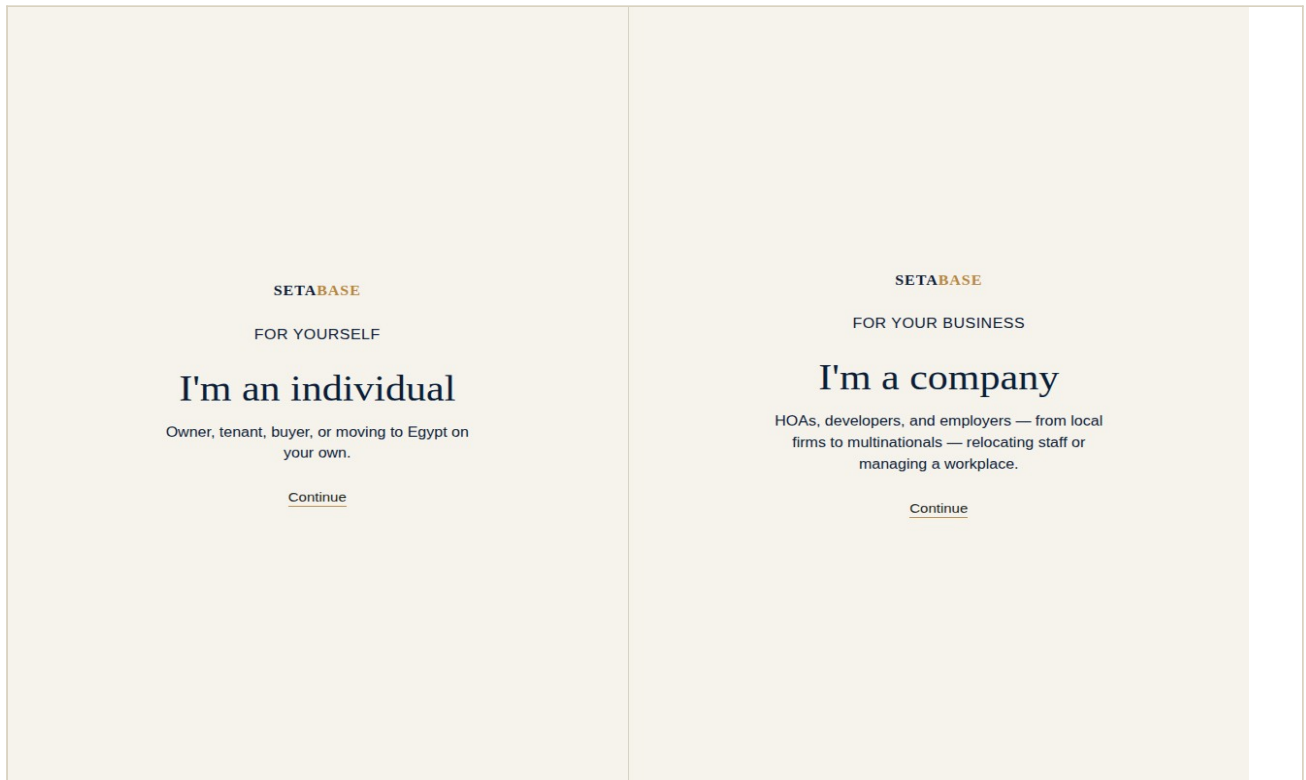

## 4. Typography

| Typeface                   | Role                                         | Weights used              |
|----------------------------|----------------------------------------------|---------------------------|
| Newsreader (serif)         | Headlines (h1, h2), logo wordmark            | 400, 500, 600, italic 400 |
| IBM Plex Sans (sans-serif) | Body copy, labels, navigation, buttons, form | 400, 500, 600             |

*Both loaded from Google Fonts. Newsreader carries the editorial, real-estate feel; IBM Plex Sans keeps body copy clean and legible.*

## 5. Page 1 — Landing / Choice Screen

A full-height split screen, divided by a single hairline. Each half is a full-bleed clickable link. On hover, that half's background flips to navy with light text — there is no button or card chrome, the whole half is the target.

*Landing screen, default state (1280px viewport).*

- Responsive: stacks vertically (top/bottom) below 720px.
- Wordmark "SETABASE" repeats at the top of each half, directly above the eyebrow label.

## 6. Page 2 — Individual

Hero with headline, supporting copy, single CTA ("Request a quote") and a summary panel of the four services.

# Everything your property needs, all in one place.

SETABASE manages rental properties, relocations and real estate for individual owners, tenants and people moving to Egypt — one partner in New Cairo instead of five.

REQUEST A QUOTE

## FOR INDIVIDUALS

Property Management

Owners & tenants

Facility Management

Villas & multi-unit owners

Relocation

People moving to Egypt

Real Estate

Sell, rent & invest

Individual page — hero section.

"What we do" — four services in a bordered grid, each with an eyebrow tag, title and short description.

## What we do

Four services, tailored to individual owners and residents.

### FOR OWNERS & TENANTS

#### Property Management

Tenant relations, rent collection and billing, deposits, yearly accounting and the paperwork that comes with owning or renting a home.

### FOR VILLAS & MULTI-UNIT OWNERS

#### Facility Management

Security, cleaning and day-to-day upkeep for a villa or a portfolio of apartments — the hands-on side of owning property.

### FOR PEOPLE MOVING TO EGYPT

#### Relocation

Home finding, viewings, temporary accommodation and settling-in support for individuals, students, families and retirees moving to Egypt.

### FOR BUYERS & SELLERS

#### Real Estate

Buying, selling and investing in property across Egypt — with strong opportunities in New Cairo, Cairo, Sahel, and the Red Sea.

Individual page — services section.

Contact section on a dark navy panel, with office details on the left and a request form on the right.

## 7. Page 3 — Company

Same structure as the Individual page, with content rewritten for a B2B audience and a fifth service (Special Services).

# Everything your property and your workplace need, all in one place.

SETABASE runs the administrative and technical side of buildings, teams, workplaces and relocations in New Cairo — so owners, HOAs and companies deal with one partner instead of five.

REQUEST A QUOTE

FIVE DEPARTMENTS, ONE TEAM

|                      |                           |
|----------------------|---------------------------|
| Property Management  | Communities & companies   |
| Facility Management  | Buildings & companies     |
| Corporate Relocation | Employees moving to Egypt |
| Special Services     | Workplace wellbeing       |
| Real Estate          | Sell, rent & invest       |

Company page — hero section.

## What we do

Five services, each one a full team on its own.

|                                                                                                                                                                                                                                               |                                                                                                                                                                                                              |                                                                                                                                                                                                 |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <div>FOR COMMUNITIES &amp; COMPANIES</div> <div>Property Management</div> <p>Owners' meetings, common charges, legal aspects and building-wide administration — full management for homeowners' associations and company-owned buildings.</p> | <div>FOR BUILDINGS &amp; COMPANIES</div> <div>Facility Management</div> <p>Security, cleaning, maintenance and the day-to-day running of a building or office, handled by our team.</p>                      | <div>FOR EMPLOYERS</div> <div>Corporate Relocation</div> <p>Housing, paperwork and settling-in support for companies relocating employees to Egypt — fast turnaround, one point of contact.</p> |
| <div>FOR WORKPLACES</div> <div>Special Services</div> <p>Subscription packages that take care of the office — supplies, wellness, and team events, priced per employee.</p>                                                                   | <div>FOR INVESTORS &amp; DEVELOPERS</div> <div>Real Estate</div> <p>Sourcing, developing and investing in property across Egypt — with strong opportunities in New Cairo, Cairo, Sahel, and the Red Sea.</p> |                                                                                                                                                                                                 |

Company page — services section (five cards).

Company page — contact section.

## 8. Interaction & Responsive Notes

- Header is sticky on scroll, with a subtle blur on the background.
- Nav links, buttons and the landing screen halves all have hover states (color or background shift, no motion effects).
- Breakpoint at 880px: navigation links hide, all multi-column grids collapse to a single column.
- Breakpoint at 720px: landing screen halves stack vertically instead of side by side.
- No animation or scroll effects beyond simple color/background transitions on hover.

## 9. Assets & Content Status

| Item            | Status      | Notes                                                                                                                                                |
|-----------------|-------------|------------------------------------------------------------------------------------------------------------------------------------------------------|
| English copy    | Final       | All headline and body text is finished and approved — reuse as-is.                                                                                   |
| Logo            | Placeholder | Footer currently uses a placeholder mark; header uses a text wordmark only. A real logo file (SVG/PNG) is needed.                                    |
| Photography     | Missing     | No real photos yet. Site is currently text-only. Needs property, lifestyle and New Cairo imagery.                                                    |
| Contact details | Placeholder | Phone number and email on the contact section are placeholders — to confirm before launch.                                                           |
| Contact form    | Not wired   | Form UI exists but does not send anywhere yet. Needs email or CRM integration.                                                                       |
| Arabic version  | Not started | Site is English-only for now — confirm if Arabic is needed.                                                                                          |
| App link        | Not started | We are building a separate app. The design needs a clear, direct link/button to it (e.g. in the header or hero) — to be wired once the app is ready. |

## 10. What We Need From You

- A quote to turn this draft into a fully responsive, production-ready site (desktop, tablet, mobile).

- Recommendations or sourcing for property/lifestyle photography for New Cairo.
- A proper logo treatment (currently a text wordmark only).
- Wiring the contact form to email or a CRM, with basic spam protection.
- Basic SEO setup (meta tags, sitemap) and hosting recommendation.
- A direct link or button to an app we're building separately (placement in the header or hero) — the app itself is not part of this brief, just the link/CTA pointing to it.
