

# BRAND GUIDELINES

---

## WHAT IS A BRAND GUIDELINE?

A brand guideline (or brand book) is the reference document that defines exactly how a company looks and sounds — its colours, typography, logo usage and UI patterns. It is the single source of truth that keeps every touchpoint (app, website, print, social media) instantly recognisable as the same brand.

## WHAT IT'S FOR

- **Consistency**

Every screen, page and document looks like it belongs to the same company, no matter who designs or builds it.

- **Speed**

Designers and developers stop guessing — colours, fonts and components are decided once, then simply reused.

- **Trust**

A coherent, polished identity signals professionalism to clients, partners and employees.

- **A shared brief**

This is exactly what we'll hand to the web designer so the final site and app match what we've validated together here.

## IDENTITY

# Colour Palette

Navy base with a metallic gold accent.

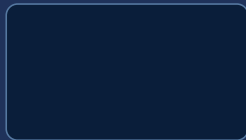

**Navy · #1F325A**

Primary background — app & site

**Medium Navy · #2E5A8F**

Panels, alternate sections

**Dark Navy · #0A1E3A**

Text on light bg, hover states

**Gold · #E6C158**

Accents, borders, CTAs, links

## Metallic Gold Gradient

linear-gradient(120deg, #B8901F 0%, #FFEBAE 26%, #F4C94A 50%, #FFF8DF 70%, #B8901F 100%)

Used on headings, eyebrow labels & the logo wordmark (gold gradient text fill).

## IDENTITY

# Typography & Logo

## HEADINGS

# Newsreader

Serif — weights 400 / 500 / 600. H1/H2, logo wordmark, hero titles, prices.  
[fonts.google.com/specimen/Newsreader](https://fonts.google.com/specimen/Newsreader)

## BODY & UI

# IBM Plex Sans

Sans-serif — weights 400 / 500 / 600. Body copy, nav, buttons, labels, uppercase titles.  
[fonts.google.com/specimen/IBM+Plex+Sans](https://fonts.google.com/specimen/IBM+Plex+Sans)

### UPPERCASE SECTION LABELS

Section headings & eyebrow tags: IBM Plex Sans, uppercase, ~0.03em tracking, gold gradient fill, never bold. e.g. “WHAT WE DO”, “TALK TO OUR TEAM”.

## LOGO

- Navy backgrounds: full colour logo as shown.
- Light backgrounds: dedicated light version (navy wordmark + gold icon) — to be made by the designer from the master file.
- Header wordmark may be plain text: Newsreader Semibold, uppercase, “BASE” in the gold gradient — SETA/BASE.
- Min. size 32px. No stretching, recolouring, rotating or effects.
